Self Definition

I am an avid learner with a passion for automation. My journey started with a project in Power Bi, where I streamlined the casino reporting, reducing it from days to mere hours. This experience started my fascination with making complex tasks more efficient and user-friendly. With this I have extended my hobby to smart home projects using Pi's, esp32 controllers, arduino and so on. My future plans are driven by a desire to continue on this path of automation and become a DevOps professional. I am to master the art of automating software development, deployment and infrastructure management. I aspire to one day become a mentor to junior professionals, sharing my knowledge, experiences and values to help them grow into great engineers.

Strength

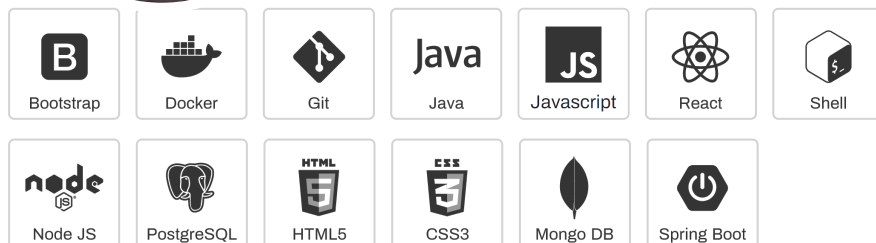

Experienced in front-end development and back-end development, with a good grasp of modern DevOps technologies. Known for delivering compelling presentations, particularly when bridging the gap between front-end design and efficient DevOps processes.

Mentor Opinion

"During this course, Razvan has enjoyed working with all the technologies studied. After the entire experience, he wants to delve further into the topic of DevOps. A programming career is not out of the question, but with passions like AWS, Google Cloud, Linux, and others, he'd make a perfect candidate for DevOps job."

— Octavian Popoviciu, mentor

Hard Skills

Recent Projects

COLORUP

<https://github.com/Rzvone/ColorUp>

This project is for a beauty salon, it's backend is based on JAVA Spring, with a PostgreSQL as database and a React with Mui styling for the frontend, all will be Docker Deployed on a Raspberry Pi Web Server. Elegantly designed with Material-UI, to offer a visually appealing user-friendly experience. Docker containerization ensures easy deployment and management of the application

NEXT PORTFOLIO

<https://razvanbobonea.vercel.app/>

Dive into my world with a personalized portfolio powered by Next.js 14, Tailwind CSS, and TypeScript. Here, I showcase not just my skills but the passion I bring to every project. Explore dynamic content highlighting my journey, projects, and achievements, all wrapped in a sleek design for a seamless user experience. This portfolio isn't just a showcase. It's a reflection of my commitment to cutting-edge web development and the unique story I bring to each line of code.

PIZZAORDER

<https://github.com/Rzvone/PizzaOrder>

A pizza ordering website that I participated in as a team at the beginning of my journey. The backend works on node.js, frontend is made by using React and some css3 styling.
